SUMMARY

Results-driven Full Stack Developer with 4+ years of experience in designing and implementing scalable Microservices, high-performance APIs and distributed systems. Adept at building end-to-end full-stack applications with a strong focus on backend efficiency and automation. Proven ability to enhance system performance, reduce manual workloads, and optimize engineering processes. Proficient in both frontend and backend development, with a deep understanding of system requirements.

TECHNICAL SKILLS

Programming Languages: JavaScript, TypeScript, Java, Python, C, C++, HTML, CSS

Frameworks & Libraries: Angular, Express.js, React, NestJS

Databases & Caching: MySQL, MongoDB, Redis

Tools & Technologies: Kafka, Jira, Bitbucket, GitLab, Git, Postman, Sentry, VS Code, Cursor

Cloud Services: AWS S3, DigitalOcean

Others: Problem Solving, Data Structures and Algorithms

PROFESSIONAL EXPERIENCE

Akrivia HCM

Hyderabad, Telangana

Software Development Engineer (SDE)

07/2022 - Present

- Developed and maintained Recruitment, Onboarding, and Helpdesk modules.
- Enhanced application performance by optimizing Angular frontend components and Express.js backend APIs.
- Designed and implemented an Automated Emailing System, reducing HR team workload by 40% with dynamic templates and attachments.
- Built an automated resume extractor that parsed emails from multiple service providers and integrated it with the applicant tracking system, saving 50+ hours per week.
- Integrated HackerRank, Aon, and Mercer Mettl assessment platforms, automating candidate evaluation and improving HR productivity by 50%.
- Streamlined the hiring process and reduced time-to-hire by integrating background verification tools Ongrid and IDfy.
- Enhanced the interview scheduling system by integrating MS Teams, Google Meet, and Zoom APIs for seamless scheduling.
- Optimized backend functions, reducing API response time by 30% through efficient database indexing and query optimization.
- Implemented event-driven architecture (Kafka) to improve real-time data processing and reduce system latency.

Software Development Engineer Intern

09/2021 - 06/2022

- Developed production-ready REST APIs for over 30 frontend pages, ensuring seamless integration with backend services.
- Led end-to-end development for multiple features, handling frontend, backend, and database migrations.
- Worked in a cross-functional team collaborating with UX designers, backend engineers, and product managers to refine requirements and improve user experience.

EDUCATION

Raghu Engineering College

Visakhapatnam, AP

Bachelor of Technology, Computer Science and Engineering

08/2018 - 06/2022

PROJECTS

Beat Box (Music Player)

- A Windows music player application that allows users to create playlists and play music with full playback controls, built using Python and the Tkinter library.

BlinkChat (Random Video Chat)

- A random video chat application that connects users with strangers for real-time conversations, built using React on the client side and Node.js with Express on the backend, leveraging Socket.IO and WebRTC for communication.
